Naheed Virk Portfolio

PROFILE SUMMARY

Senior Front-End/UI Engineer with 15+ years of experience designing and developing scalable, accessible, and high-performance web applications for enterprise organizations across healthcare, finance, automotive, insurance, manufacturing, and digital publishing. Expertise in React, Next.js, TypeScript, JavaScript, Angular, Material UI, Tailwind CSS, and enterprise Design Systems. Experienced in building reusable component libraries, improving application performance, implementing WCAG-compliant solutions, and mentoring developers through modern front-end architecture and best practices.

CORE COMPETENCIES

UI/UX & Design

- Design Systems | Motion
- Figma | Sketch | Adobe XD | Axure RP
- Responsive Design | Accessibility (WCAG, IEC 62304)

Front-End Development

- React | Next.js | Angular | Vue.js | Storybook
- TypeScript | JavaScript (ES6+)
- HTML5 | CSS3 | Tailwind CSS | Material UI | Bootstrap | SASS

Back-End & APIs

- REST APIs | GraphQL | Microservices
- Node.js | JSON | API Integration
- MongoDB | MySQL

Testing & Quality

- Playwright | Cypress | Jest | Jasmine | Karma
- Visual Regression Testing | Component Testing
- Accessibility Testing | End-to-End Testing

Cloud, DevOps & Tools

- AWS | GCP | Docker | CI/CD
- Azure DevOps | Git | GitHub
- pnpm | npm | Yarn | Vercel

PROFESSIONAL EXPERIENCE

Client - John Deere, IA

Senior UI/UX Front-End Developer | May 2025 – Present

- Design, develop, and maintain scalable React components using Material UI (MUI), React Hooks, Styled Components, SASS, and Tailwind CSS, improving component reusability, consistency, and maintainability across enterprise applications.
- Contribute to the Enterprise Design System by building reusable UI components, shared patterns, and coding standards adopted across multiple product lines, improving developer productivity and user experience consistency.
- Build and document component libraries in Storybook with theme management, interactive testing, and comprehensive documentation to support enterprise-wide adoption and collaboration between development and UX teams.
- Develop lightweight Node.js utilities and services supporting component APIs, data transformation, and integration with internal microservices.
- Improve application quality, accessibility, and release reliability through Playwright, Cypress, TDD practices, CI/CD pipelines, and Docker-based development workflows while ensuring WCAG compliance.
- Collaborate with UX designers, product owners, and cross-functional engineering teams in Agile/Scrum environments to deliver responsive, accessible, and high-performance enterprise user interfaces while supporting production issues and continuous improvement.

Client – HSBC, NY

Senior UI/UX Front-End Developer | Jul 2024 – Apr 2025

- **UI/UX & Accessibility:** Collaborated with UX teams to design and develop accessible, user-centered financial applications using Figma, ensuring WCAG compliance and adherence to IEC 62304 standards.
- **Front-End Development:** Built scalable, responsive SPAs using Angular, React, Vue.js, Redux, GraphQL, and TypeScript with modular, maintainable architectures.
- **Cloud & DevOps:** Deployed containerized applications on GCP (GKE) using Docker and Kubernetes, supporting microservices delivery through AWS CloudWatch and Azure DevOps.
- **Performance & Quality Engineering:** Improved application performance through lazy loading, code splitting, and refactoring; implemented automated testing and CI/CD pipelines using Jest, Selenium, AWS CodePipeline, and AWS CodeBuild.

- Leadership & Collaboration: Ensured accessibility compliance using Lighthouse and Axe while mentoring junior developers and collaborating with cross-functional teams to deliver enterprise financial solutions.

Client – IMG (International Medical Group), IN

Senior UI Web Developer / Nov 2022 – Jun 2024

- Developed and maintained enterprise web applications using React, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, and Bootstrap, delivering responsive and accessible user experiences across desktop and mobile platforms.
- Designed and implemented reusable UI components, shared libraries, and modular front-end architectures to improve code consistency, maintainability, and scalability across multiple applications.
- Built React components using functional components, React Hooks, and component composition while implementing Redux for scalable state management using actions, reducers, and selectors.
- Integrated RESTful APIs and collaborated with backend teams to deliver secure, reliable client-server solutions while optimizing application performance through lazy loading, code optimization, and efficient rendering practices.
- Supported Agile development through code reviews, production troubleshooting, dependency management, and collaboration with cross-functional teams to deliver high-quality software and promote front-end best practices.

Client - Ford Motor Company, MI

UI Front-End Developer / UI/UX Developer

Aug 2015 – Jul 2022

- Served as a key member of Ford's Web & Mobile Center of Excellence (COE) team, developing enterprise front-end frameworks, reference applications, and reusable UI solutions adopted across multiple business units.
- Designed and developed scalable Single Page Applications (SPAs) and reusable UI frameworks using AngularJS, JavaScript (ES6), HTML5, CSS3, Bootstrap, and modern front-end architecture patterns.
- Created standardized UI components, coding guidelines, and development practices that improved application consistency, maintainability, and scalability across enterprise platforms.
- Collaborated with backend teams to establish RESTful integration patterns between front-end applications and Java-based services while supporting enterprise application development workflows using Node.js, npm, Bower, and Grunt.
- Provided technical mentoring, hands-on development support, and training programs covering JavaScript, AngularJS, responsive design, and front-end best practices for enterprise development teams.
- Implemented responsive, accessible, and cross-browser compatible interfaces while applying TDD/BDD practices and Agile/Scrum methodologies to improve software quality and delivery.

Client - JSTOR/ITHAKA, MI

UI UX Front-End Developer | Jun 2011 – Jul 2015

- **UI/UX Design & Prototyping:** Actively developed wireframes and prototypes in **Axure RP**, and designed academic search interfaces with **Sketch**, focusing on accessibility and efficient content retrieval. Created responsive designs for seamless desktop and mobile experiences.
- Followed designs from UI/UX team to develop and update components.
- Collaborated with product and marketing teams to support campaign-based UI enhancements, aligning design strategies with user acquisition and retention goals.
- **Usability & Accessibility:** Conducted usability testing with **User Testing** to enhance navigation and interaction with academic content. Ensured **WCAG** compliance using **WCAG Validator**, making platforms accessible for all users.
- **Platform Optimization:** Streamlined user registration and login processes with **Optimizely**, reducing access barriers. Redesigned **JSTOR** with **Sketch**, improving layouts and navigation to optimize the user experience.
- **Visual Design & Collaboration:** Created promotional designs with **Canva** to increase platform engagement and collaborated with cross-functional teams via **Jira** to ensure project alignment and progress.

Client - Kaplan Financials, WI

UI/UX Developer / Front-End Developer | May 2010 – Nov 2010

- Designed interactive e-learning interfaces; conducted user research & accessibility testing.
- Worked with stakeholders to address the issues with educational content and improved the application by fixing bugs.

Client - Chrysler Corporation, MI

Web Application Developer | Mar 2005 – Apr 2010

- **Managed & Enhanced Transmittal Database System:** Maintained a critical system for identifying and resolving vehicle issues.
- **Feature Development & Support:** Provided support, maintenance, and feature enhancements to improve system functionality.
- **User Collaboration:** Worked closely with end users to troubleshoot and resolve issues efficiently.
- **Technology Stack:** Java/J2EE, JSP, Servlets, Java Beans, JavaScript, HTML, WebSphere 6.02, DB2, SQL Server, Stored Procedures, Dimension, Unix, Dreamweaver, Fireworks.

PERSONAL PROJECTS

Personal Portfolio Website | 2026

Live: Naheed Virk Portfolio

GitHub: <https://github.com/naheedkvirk/portfolio>

- Designed and developed a modern portfolio website using Next.js 16, React, TypeScript, Tailwind CSS, and Motion, showcasing reusable component architecture and responsive UI development.
- Built accessible, reusable UI components with centralized styling patterns and design tokens to improve maintainability, consistency, and scalability.
- Implemented responsive layouts, animations, SEO optimization, and performance best practices following modern Next.js architecture.
- Deployed the application on Vercel with GitHub-based CI/CD workflows.

EDUCATION

B.S. (Computer Science) Wayne State University, Detroit, MI
