

NAHEED VIRK (US Citizen)
UI/UX Front-End Web Application Developer
+1(586) 933-6824 | Email : naheedvirk786@gmail.com

PROFILE SUMMARY

Senior UI/UX Developer with 15+ years delivering intuitive, accessible, high-performance web & mobile applications in financial services, healthcare, automotive, and e-commerce. Expert in **React, Material UI, Angular, Typescript, Vue.js**, and modern front-end frameworks. Skilled in accessibility (WCAG, IEC 62304), design systems, performance optimization, and mentoring cross-functional teams.

DOMAIN SKILLS

UI/UX & Design

- UI/UX Design & Development | Interaction Patterns | Design Systems
- Wireframing, Prototyping | User Research | Information Architecture
- Accessibility & Usability (WCAG, IEC 62304)

Front-End Development

- React, Material UI, Redux | Angular | TypeScript | JavaScript | Vue.js
- HTML5, CSS3, Tailwind, SASS | Responsive & Cross-Browser Design

Back-End & APIs

- REST, GraphQL | Node.js | Laravel | Python | MongoDB | MySQL

Testing & QA

- Playwright | Cypress | Visual Regression Testing | Jest | Jasmine | Karma | Automated Testing | E2E Testing | Component Testing | Accessibility Testing
- Cloud, Deployment & Security
- AWS | GCP | **Docker Desktop** | CI/CD | **Zscaler** | Performance Optimization

TECHNICAL SKILLS

- **Design Tools:** Proficient in Figma, Sketch, Adobe XD, and Axure RP for creating intuitive and visually appealing user interfaces.

- **Front-End Development:** Extensive experience with HTML5, CSS3, Tailwind CSS, GraphQL, React, Redux, Angular (V14), Vue.js, TypeScript, JavaScript, and pnpm.
- **Mobile Development:** Competent in mobile app development using React Native and Flutter.
- **APIs & Databases:** Adept in working with RESTful APIs, Node.js, MongoDB, and MySQL for robust backend integration.
- **Back-End Development:** Proficient in **Python** (self-taught) and **Laravel** for server-side development and API creation.
- **Performance Optimization:** Skilled in implementing lazy loading, code splitting, and responsive design principles to enhance application performance.
- **Testing Tools:** Experienced with Playwright, Cypress, Jasmine, Karma, Lighthouse, and Axe for unit testing, integration testing, and accessibility audits.
- **Cloud & Deployment:** Proficient in **AWS** and **GCP** for front-end development, ensuring scalable and reliable applications.

PROFESSIONAL EXPERIENCE

Client - John Deere, IA

Senior Application Developer / UI/UX Developer / Front-End Developer | May 2025 – Present

- Active member of the **Design System Team**, delivering front-end solutions for the enterprise design system across multiple product lines.
- Develop, enhance, and maintain **reusable React components with easy-to-use APIs**, enabling faster development, optimization, and refactoring code to reduce duplication and improve maintainability.
- Develop UI components using **Material UI (MUI), React Hooks, Styled Components, and SASS**, ensuring scalable and high-performance component architecture.
- Developed reusable **UI components** within the **design system** that supported consistent branding and marketing experience across enterprise applications.
- Designed reusable and modular **React** components using **props** for parent-to-child data flow, improving code maintainability and scalability.

- Implemented efficient **DOM** manipulation techniques using **JavaScript** and **React** to dynamically update UI elements, improving application responsiveness and user experience.
- Utilize **Storybook** to build, test, and document UI components in isolation, enabling theme management (light/dark) and interactive prop simulation to accelerate development.
- Improve **accessibility compliance and application quality** through Playwright and Cypress end-to-end testing, CI/CD pipelines, Docker Desktop workflows, and TDD practices.
- Participate in **Agile ceremonies** including sprint planning, stand-ups, retrospectives, and sprint demos to present team deliverables.
- Provide **on-call support for cross-team UI issues**, assisting product teams with troubleshooting component integration and resolving front-end defects.
- Develop lightweight **Node.js** services and utilities to support component APIs, data transformation, and integration with internal microservices.
- Implement responsive UI layouts using **Tailwind CSS** alongside Material UI, improving styling consistency and accelerating component development within the design system.

Client – HSBC, NY

Senior UI/UX Developer / Front-End Developer | Jul 2024 – Apr 2025

- **UI/UX Design:** Collaborated with the UX team to design an accessible, user-centered financial application in Figma, meeting WCAG and IEC 62304 standards.
- **Front-End Development:** Built scalable SPAs using Angular, React, Vue.js, Redux, GraphQL, and TypeScript with modular, maintainable architecture.
- **Responsive Development:** Ensured applications were accessible and fully functional across all devices, including mobile, tablet, and desktop.
- **Cloud & DevOps:** Deployed containerized applications on GCP (GKE) using Docker and Kubernetes; supported microservices delivery with AWS CloudWatch and Azure DevOps.
- **Performance Optimization:** Enhanced application performance through lazy loading, code splitting, and code refactoring for optimization.
- **Testing & CI/CD:** Implemented automated testing and CI/CD pipelines using AWS CodePipeline, AWS Code Build, Jest, and Selenium.

- **Accessibility & Mentorship:** Ensured WCAG compliance using Lighthouse and Axe while mentoring junior developers and collaborating with cross-functional teams.

Client - International Medical Group, IN

Senior UI Web Developer | Nov 2022 – Jun 2024

- Worked with React.js to improve and enhance the functionality.
- Developed and maintained React components using React Hooks and functional components.
- Optimized UI performance by minimizing direct DOM access and leveraging virtual DOM diffing in React for faster rendering.
- Integrated Redux for state management, including creating actions, reducers, and selectors.
- Utilized props validation and default props to enforce type safety and ensure reliable component behavior.
- Used NPM and Yarn for installing required dependencies and managing third-party libraries.
- Built reusable components and templates to streamline development and ensure consistency across the application.
- Debugged and fixed issues to enhance performance and improve user experience.

Client - Ford Motor Company, MI

UI Front-End Developer | UI/UX Developer

Aug 2015 – Jul 2022

- **Key contributor** to the Web and Mobile Enablement (WaMe) team, managing Ford's Reference Application (JAB) with a **front-end built in Angular and Bootstrap** and a **Java-based backend**.
- Developed and enhanced reusable **Angular components** (Angular 8–15), managing forms, event handling, and state across multiple application modules.
- Designed responsive, accessible UI components using **HTML5, CSS3, SASS, Bootstrap, and modern TypeScript/JavaScript (ES6+)**.
- Built scalable front-end architecture with **Angular Router, RxJS, NgRx (Store/Effects), and modular component design**.
- Integrated **RESTful APIs** using **HttpClient** to support dynamic data operations (GET, POST, PUT, DELETE).

- Modernized legacy Angular applications by migrating **AngularJS/class-based components to Angular 2+ with reactive forms and services**, improving maintainability and performance.
- Implemented a comprehensive testing strategy including **unit testing (Jasmine, Karma) and end-to-end testing (Cypress)**.
- Ensured **cross-browser compatibility** across Internet Explorer, Chrome, Firefox, and Safari while performing modern browser remediation to align legacy applications with current web standards.
- Collaborated within an **Agile/Scrum environment**, participating in sprint planning, stand-ups, and retrospectives while providing front-end expertise to cross-functional teams.

Client - JSTOR/ITHAKA, MI

UI UX Front-End Developer | Jun 2011 – Jul 2015

- **UI/UX Design & Prototyping:** Actively developed wireframes and prototypes in **Axure RP**, and designed academic search interfaces with **Sketch**, focusing on accessibility and efficient content retrieval. Created responsive designs for seamless desktop and mobile experiences.
- Followed designs from UI/UX team to develop and update components.
- Collaborated with product and marketing teams to support campaign-based UI enhancements, aligning design strategies with user acquisition and retention goals.
- **Usability & Accessibility:** Conducted usability testing with **User Testing** to enhance navigation and interaction with academic content. Ensured **WCAG** compliance using **WCAG Validator**, making platforms accessible for all users.
- **Platform Optimization:** Streamlined user registration and login processes with **Optimizely**, reducing access barriers. Redesigned **JSTOR** with **Sketch**, improving layouts and navigation to optimize the user experience.
- **Visual Design & Collaboration:** Created promotional designs with **Canva** to increase platform engagement and collaborated with cross-functional teams via **Jira** to ensure project alignment and progress.

Client - Kaplan Financials, WI

UI/UX Developer / Front-End Developer | May 2010 – Nov 2010

- Designed interactive e-learning interfaces; conducted user research & accessibility testing.
- Worked with stakeholders to address the issues with educational content and improved the application by fixing bugs.

Client - Chrysler Corporation, MI

Web Application Developer | Mar 2005 – Apr 2010

- **Managed & Enhanced Transmittal Database System:** Maintained a critical system for identifying and resolving vehicle issues.
- **Feature Development & Support:** Provided support, maintenance, and feature enhancements to improve system functionality.
- **User Collaboration:** Worked closely with end users to troubleshoot and resolve issues efficiently.
- **Technology Stack:** Java/J2EE, JSP, Servlets, Java Beans, JavaScript, HTML, WebSphere 6.02, DB2, SQL Server, Stored Procedures, Dimension, Unix, Dreamweaver, Fireworks.

EDUCATION

B.S. (Computer Science) Wayne State University, Detroit, MI
